PROJECTS

GROCERY STORE DATABASE MANAGEMENT SYSTEM | November 2021 - February 2022

- The adoption of online grocery shopping is growing rapidly at the moments. Findings show that consumers prefer to purchase packaged goods in an online supermarket. The system will display all the items whose name start with the letter selected by the user. He can select out of those displayed. Finally a separate bill will be generated for each customer. This will be saved in the database.
